Overview of new fields in iDEAL Merchant Portal and how to fill these in:

Field name	Information for Merchant
cPSP check flag	Mandatory field. This field applies to Collecting Payment Service Providers only and will be filled in by ABN AMRO.
CPSP Scheme ID & C2C Provider Scheme ID	Mandatory field. This field only applies to Collecting Payment Service Providers and Consumer 2 Consumer Providers and is filled in by ABN AMRO.
Return URL	Optional field for Merchants/CPSP to fill in. Purpose is to return the consumer back to the webshop. When you fill in this field in the iDEAL Merchant Portal, the benefit is that you do not have to fill it in via the (iDEAL 2.0) Open Banking API. If the field is filled in both the API but also entered as a fixed value in the iDEAL Merchant Portal, the value from the API is taken and will override the fixed value from the iDEAL Merchant Portal. This is also explained in the Getting Started Guide.
Debtortoken callback URL	Optional field for Merchants/CPSP to fill in. You are only required to complete this field when you want to make use of user tokens. When you fill in this field in the iDEAL Merchant Portal, the benefit is that you do not have to fill it in via the (iDEAL 2.0) Open Banking API. This is also explained in the Getting Started Guide.
Status Notification URL	Optional, yet highly recommended field for Merchants. Reason is that Merchant are not encouraged to pull for 'status requests' of iDEAL transactions. Get payment status is another way to retrieve the status of a transaction. The notification is the primary means recommended to get the payment status. The details on how to use the notifications are in the Implementation Guide.

ABN·AMRO

Overview of new fields in MSP Dashboard and how to fill these in:

Fields	Information for Merchant
Notification Bearer Token	Required for merchants if you want to have a Status Notification of the transaction. Please note: If Status Notification URL (or Debtortoken Callback URL) is provided by Merchant in the iDEAL Merchant Portal, then the Notification Bearer token becomes mandatory. The notification bearer token is an additional security feature which allows you to authenticate messages that are returned to you. It is a string (like a password) that you provide in the iDEAL Merchant Portal after which with you will receive the status notification. You can verify the authenticity of the message by ensuring that the two strings match.
Country Code	Mandatory field. Will be filled in by ABN AMRO for Merchants. CPSPs will have to fill in for their own sub-merchants.
MCC Code	Mandatory field. Will be filled in by ABN AMRO for Merchants. CPSPs will have to fill in for their own sub-merchants.
